## Step 2 – Open the databases section and select Create database or Mysql DB Wizard :

Account  
 User  
 Support Center  
 FTP/User Account  
 Databases  
   MySQL  
     MySQL DBs  
     MySQL DB Wizard  
   PGSQL  
 Domain Settings  
 Billing  
 Mail Info  
 Logout

Logged in as: flashtemplate  
 Log out

### MySQL DB Wizard

**MySQL Management**  
 MySQL

**The MySQL Database Creation Wizard Step 1**  
 The first step of the MySQL database creation wizard allows you to create a database. In the Name of database field enter the name of the database you are creating. This name will be used later when you connect to the database from any database client or tool. The Database description field allows you to provide a short description of the database. This description is used only in the control panel to remind you of the purpose of this database.

Name of database	flashte
Database description	

© Copyright 1999-2009, Parallels  
 All rights reserved

### Step 3 – Create a user for your database :

Account  
 User  
 Support Center  
 FTP/User Account  
 Databases  
   MySQL  
     MySQL DBs  
       MySQL DB Wizard  
   PGSQL  
 Domain Settings  
 Billing  
 Mail Info  
 Logout

Logged in as: flashtemplate  
 Log out

#### MySQL DB Wizard

 **Information:** Database flashte\_cms has been created successfully

##### The MySQL Database Creation Wizard Step 2. Adding Users to flashte\_cms

In this step you will add users and set their privileges on the newly created database. In the left part of the form you can add new users. In the right part you can set privileges for already existing users on the newly created database. To add a new user, enter the user login and password, then select a typical role for this user. If you need to set more specific privileges, you can do this from the "MySQL privileges" form later (after the user has been created). To set privileges on the newly created database for an existing user, select this user from the list, then select a typical role of this user and then press the "Add existing user" button. If you need to set more specific privileges on the database, you can do this from the "MySQL privileges" form later.

##### Add MySQL user to the database flashte\_cms

User name	flashte_admin +
Password	.... !
Confirm password	.... !
User role	dba

Add user

Finish

Optimized Computing

### MySQL DB Wizard

 **Information:** User admin has been added successfully

**The MySQL Database Creation Wizard Step 2. Adding Users to flashte\_cms**

In this step you will add users and set their privileges on the newly created database. In the left part of the form you can add new users. In the right part you can set privileges for already existing users on the newly created database. To add a new user, enter the user login and password, then select a typical role for this user. If you need to set more specific privileges, you can do this from the "MySQL privileges" form later (after the user has been created). To set privileges on the newly created database for an existing user, select this user from the list, then select a typical role of this user and then press the "Add existing user" button. If you need to set more specific privileges on the database, you can do this from the "MySQL privileges" form later.

**Add MySQL user to the database flashte\_cms**

User name: flashte\_

Password:  !

Confirm password:  !

User role: read

**Granting privileges to an existing user on the database flashte\_cms**

Pick user: flashte\_admin

User role: read

## Step 5 – Finishing:
